IV. CHART CORRECTIONS

(Explanation of Format)

Corrective action, affecting charts, is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Reference datum	Source of correction	Current Notice to Mariners
11534 (Temp)	26th ed. Myrtle Grove Add	12/14/91	Last LNM 41/92 Sound to Fear River to Casino Creek *Boguse Channel Light 1, Fl G 2.5s, 16 ft, 7M	NAD 83	(CDG07)	06/93
	Corrective action		Object of corrective		32-48-00.000N 079-15-00.000W	Position action

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (TEMP) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (m). (*) Asterisk is used to identify Private Aids.

None.

VII. GENERAL

A. BRIDGE INFORMATION

FLORIDA-ST. JOHNS RIVER-TROUT RIVER: Special Bridge Notice.

The Coast Guard has approved the request by TIC The Industrial Company to temporarily deviate from the operating regulations on the swingspan railroad bridge across the Trout River, mile 0.9, at Jacksonville, Duval County, Florida. The mechanical upgrade to this bridge is necessary to prevent an emergency shutdown situation caused by a mechanical failure. Therefore, the swingspan railroad bridge will not open for navigation from 8 a.m. to 6 p.m. on Tuesday, February 29, 2000. On March 1st and 2nd, the swingbridge will be operational but marine traffic can expect up to 30-minute delays. This railroad drawbridge provides a vertical clearance of 2 feet above mean high water and a horizontal clearance of 46 feet.
